even though your infant can't do much more than smile, poop, eat, and cry, it's hard to resist the urge to gaze into her little face and imagine what she'll be like a few years down the road

diabeteshealth.com

these medications include imipramine (tofranil), amitriptyline (elavil), nortriptyline (vivactil, pamelor), desipramine (norpramin), and doxepin (sinequan)
